## FOREWORD

### General

This design manual is intended to standardize design parameters and construction details in the City of Belton and the extraterritorial jurisdiction areas of the City. Modifications or departures from these standards should be identified and supported using sound technical data and bibliographical references. All departures and/or modifications to this document must receive final acceptance by the Director of Public Works and the City Manager.

Also, all topographic, horizontal and vertical data used in the design process shall be based on the City of Belton current Williams-Stackhouse, Inc., maps including elevation and coordinate data.

Updates for this manual may be adopted from time to time. Therefore, the user should provide any current address or future address changes to the Public Works Department for notification purposes.

### Use and Modification

The use of these standards shall be under the supervision and seal of a professional engineer in the State of Texas. Any modification to these standard specifications and drawings shall be clearly noted on engineering plans and documents prepared under the supervision and seal of a registered professional engineer.

### Special Note

State and Federal revised standards may change some of the data contained herein. The user should always be aware of those standards changes prior to using this document for design and construction purposes.
